For Your  
1956  
Planting  
Season

# Englerth Gardens

4652 Division Ave., S.

Grand Rapids 8, Mich.

Daylilies,  
Oriental Poppies,  
Irises,  
Phlox, Etc.

## To Our Gardening Friends -

We are located on U.S. highway 131, three miles south of Grand Rapids' city limits, which is the junction of U.S. 16 Bypass and 131. If you come from the south, we are four blocks north from where the four-lane highway starts.

As we have many things not listed here, you are invited to come in and browse around at any time.

The Daylilies make their best showing through July, but there is some bloom from late May until freezing weather. And we have a variety of other interesting displays throughout the season. Tulip time here is followed by Iris time, with splashes of Oriental Poppies. Phlox are colorful in late June and into August, and from September until frost the Mum fields make a brilliant show.

## The Englerths

BILLIE BURKE.

## For a Long - Bloom Season

Plant Heuchera Brizoides and it will furnish its soft misty pink color from iris time on into mid-season.

Echinops Taplow Blue, a fine background plant, will display its steel-blue balls for a long time in midsummer, and then if cut back, will bloom again in September.

Doubloon Daylilies, when established, keeps sending up bloom stalks here from July until September, and sometimes until cut down by frost.

Daylily Blanche Hooker blooms as profusely here in September as it does in early June. Others that can usually be depended upon for second bloom are Zouave, Dominion, Potentate, Bountiful and Oneita. Queen Esther and Papagaio are bright daylilies with exceptionally long bloom seasons.

## Please Read Before Ordering

**POSTAGE:** All orders for \$3.00 or over will be sent postpaid. With orders for less than that amount please include 50c for packing and mailing. No C.O.D. orders, please, as they add much to your cost and ours.

Michigan customers please include 3% sales tax.

We send freshly dug, blooming size plants, guaranteed to be true to name. If they do not arrive in good condition, do not return them, but give them the best possible treatment, and write us at once, indicating adjustment desired. Also, if there should be any error in labeling, let us know as soon as possible.

## — To Our Local Customers

At our nursery sales lot, 4620 So. Division Ave., we carry a complete line of garden fertilizers, sprays and dusts, lawn seed, other garden seeds, bulbs, annual and perennial plants, shrubs, evergreens and small trees. Also, bird-baths, urns and other garden ornaments, power lawn mowers and Roto-Hoes.

Our selection of potted Roses covers all the popular Floribundas, Hybrid Teas and Climbers, and these can be set into your garden with growth starting or in full bloom with no harm to the plant.

We also carry a large assortment of spring-blooming bulbs. Come and see these blooming in our display gardens in the spring, and make your selections for fall planting.

We have many plants in our field which we do not have the space to display at our sales lot, and do not have the personnel at all times available to dig individual orders from the field, so it is well to give us some advance notice on special orders.

# Daylilies

(HEMEROCALLIS)

Abbreviations used are as follows:

- E—Early; late May and early June in this locality.  
 I—Intermediate; from early to mid-June into July.  
 M—Midseason or July bloomers.  
 LM—Late midseason; July into August.  
 L—Late; August and September.  
 RE—Has repeat bloom.  
 Ev—Has evergreen foliage tendencies.  
 De—Foliage is dormant in the winter.  
 OE—Remains open into the evening.

**DOROTHY McDADE.** (Sass.) 40" L-Ev-OE. Large, tubular shaped, light yellow, good texture. **\$0.75**

## Daylilies - (Hemerocallis)

The Daylily is the most versatile of perennials, and can be used in all parts of your garden, for bloom all through the growing season. They can furnish shades of yellow, orange and brown with your Iris in late spring. They can be planted all through the perennial border to furnish shades of cream and gold, the sunshine colors, during the entire season. They can make bold splashes of orange, flame and shades of red against evergreens or shrubbery where you wish to make an accent point. Or you may have a garden of Daylilies by themselves, in all their lovely shades.

**CULTURE:** The Daylilies will grow in any good garden soil and are very drought resistant. However, they do appreciate plenty of moisture and nourishment. They will grow and bloom in partial shade, but should have sun for half a day, as too deep shade will cause weak stems and fewer blooms. They should be left undisturbed over a period of years, as they do not give their best performance until the second or third year. So they should be spaced from two to three feet apart to permit increase in size of clumps. Spread the roots out well when planting, and firm the soil down well. Well-rotted manure or compost with bone meal will be appreciated if incorporated in the soil while planting, and peat moss is also found to be beneficial.

Our prices are for blooming size plants. Daylilies will be shipped in the spring, or in late summer and fall.

- DOUBLOON.** (Nesmith.) 40" M-RE. Nice large orange with continuous blooming habit. \$1.00
- DR. STOUT.** (Traub.) 38" M-OE. Orange burnished red, bright and gay. \$0.75
